Attention : this tool is not a crack, it's a patch. Caution : This tool is useful only if you have the original interface from your own car (in reference with your car type/model). It's important to note that this tool can only display a particular information in a particular way, depending on its original source. Attention 2 : Your actual software version (from your car) is usually very different to the interface you see in the screenshots, this is because the software is "patched" to match your own car. Attention 3: This tool may not display all the information available in your car. Check the car model and the exact year of your car. Attention 4: Please notice that the latest version of the VCDS interface may be different from the software you have installed. List of supported vehicles : Audio systems : Audi, VW, Seat and Skoda Engine control systems : Audi, VW and Seat Engine management systems : Audi, VW and Seat Features Auto detection of the control module. Automatic detection of the vehicle. Time to repair. Import/Export of data. DVD video (the video part). Ability to re-install the software. Ability to launch the software. Ability to display all the information available in the car (TDI,,,,,,,,,...). Ability to display the control limits (SFI,,,,,,,,...)

Requirements Windows : 98, 2000, Me, XP, Vista, 7, 8, 8.1 or 10. (All editions) Service Pack 3 or greater. Java Runtime Environment v.6 or greater. VCDS Interface All VCDS interfaces are displayed on a 3.5" TFT display. The interface displays the following information : In the left column, all the original functions (start, stop and restart engines, pressure, temperature, intake and injection,...). In the right column, all the information related to the control module (exhaust gas, O2,...). Information for every engine driving mode (Start, Run, ID, E-brake, Custom,...). References External links Official page of this software Category:Automotive software Category:Vehicle softwareQ: Dim does not work for variables with the same name I've been learning Python recently and came across f678ea9f9e
